

DYLAN FERREIRA

DATA ENGINEER | AZURE & MICROSOFT FABRIC | SQL | PYTHON | ETL/ELT

Hanford, CA | 559-205-4802 | ferreira.dylan98@gmail.com | linkedin.com/in/dylanferreirais

Summary

Data engineer and database administrator with 4+ years of experience in ETL/ELT, cloud data platforms, and system integrations. Built Azure Data Factory and Microsoft Fabric pipelines for 26 campuses and automated data processing with Python and PySpark.

Technical skills

Data platforms: Microsoft Fabric, Azure Data Factory (ADF), ADLS Gen2, Fabric Lakehouse, Delta Lake, SQL Server, Azure SQL, PostgreSQL

Languages and integration: Python, PySpark, SQL, T-SQL, PowerShell, SQLAlchemy, pyodbc, REST APIs, JSON, Azure Key Vault

Engineering and operations: ETL/ELT, data modeling and warehousing, medallion architecture, Bronze/Silver layers, incremental processing, schema management, data validation, query optimization, indexing, backup and recovery, access controls

Analytics tools: Power BI, Pecan AI, Instructure Canvas Data 2, Azure Document Intelligence

Professional experience

Data Engineer / Junior Database Administrator | San Joaquin Valley College

01/2022 - 09/2026

- Built and maintained ADF pipelines and dataflows and Microsoft Fabric Bronze/Silver layers for 26 campuses, integrating Excel, JSON, REST APIs, Azure Storage, SQL Server, Azure SQL, and Fabric Lakehouses.
- Automated manual Excel imports with PySpark in Microsoft Fabric, using MTD/YTD logic to handle overlapping records and preserve historical consistency.
- Managed Delta Lake tables and incremental processing; resolved merge conflicts, schema drift, datatype issues, and downstream Power BI data availability problems.
- Built integrations with Instructure and Azure Document Intelligence using Python, PowerShell, T-SQL, SQLAlchemy, pyodbc, APIs, and Azure Key Vault to automate data movement and reduce manual processing.
- Developed, trained, and deployed 4 predictive models for student retention and financial risk. Leadership shared predictions with operational teams to guide outreach aimed at reducing student drops and potential bad debt.
- Administered SQL Server, Azure SQL, and PostgreSQL, supporting query tuning, stored procedures, indexing, backup and recovery, security, and access controls.

Selected projects

Instructure Canvas Data 2 Integration

- Built Python synchronization scripts running daily in Microsoft Fabric to ingest Canvas LMS enrollment, course, submission, and user data for reporting and analytics.
- Validated data with SQL and troubleshoot long-running syncs, consistency issues, and integration failures, coordinating with vendor support when needed.

Power BI Data Validation & Reconciliation

- Built Power BI validation workflows to compare automated pipeline outputs with existing manual imports and verify data accuracy.

Academic & Financial Predictive Modeling

- Used Pecan AI to prepare and validate historical data, evaluate predictive features and model performance, and support outreach for academic risk, early dropout, repayment, and potential bad debt.

Additional experience

Help Desk Specialist, Tier 1 | San Joaquin Valley College | 09/2019 - 12/2021

Provided Tier 1 support across 26 campuses, including Active Directory/Azure AD administration, JAMF-managed MDM deployments, troubleshooting, and self-service documentation.

IT Field Technician | Mobile Technologies Inc. (MTI) | 05/2019 - 09/2019

Installed and serviced retail security displays, POS systems, and network devices; performed Cat-5/6 and PoE cabling, troubleshooting, and break-fix repairs. Logged and closed on-site service tickets using the MTI Field Technician App.

Computer Repair Technician | Ferreira PC Repair | 01/2018 - Present

Build custom PCs and troubleshoot hardware, operating systems, and networks for individual clients.

Education & certifications

Associate of Science in Information Technology | San Joaquin Valley College | 01/2017 - 10/2018

Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft Certified: Azure Data Fundamentals (DP-900)
